

The environmental protection policy of MEWO S.A. is based on the principles of sustainable development. Its aim is to ensure conditions which would enable limitation and supervision of the company's business activity's environmental impact..

Being fully aware of the potential consequences of impacting on the natural environment and necessity to improve activities relating to its protection, we undertake to:

- continuously improve the Management System of MEWO S.A., putting particular emphasis on raising the concern for the condition of the natural environment as one of the most significant strategic factors,
- conduct activities relating to prevention of pollution arising from the nature of our business activity,
- meet requirements arising from the applicable provisions of law regarding the environment,
- adhere to international conventions and other international laws, including the EU law, regarding the environmental protection.

We implement our policy through:

- reasonable use of natural resources,
- maintenance of waste management which is safe for the environment and which ensures proper segregation, waste re-use or utilisation, in accordance with the requirements of the environmental protection,
- effective and economical energy and water management,
- analysis of the effect of the planned projects with regard to the environmental impact,
- prevention of extraordinary threats to the natural environment,
- arrangement of purchases of office materials from recycling, in collective packaging,
- economical driving, logistic planning of business trips,
- raising the Partner's awareness by means of trainings and shaping conscious and responsible attitude towards activities which are friendly to the natural environment,
- audits of compliance of project implementation and functioning of the company with the legal requirements and the environmental protection policy of MEWO S.A.,
- periodical assessment of effectiveness of the implementation of the adopted aims and tasks,
- creation of the company image which is friendly to the environment,
- meeting the requirements included in legal provisions and other requirements concerning proper functioning of the enterprise, including the Client's requirements, as well as maintaining and improving the process of environmental protection management, and
- selection of subcontractors who meet the requirements of the Environmental Protection Policy of MEWO S.A.

The foregoing elements constitute a priority in the activity in the field of the environmental protection.
